L1400mm x W800mm x H300mm, Diameter 900mm x H300mm

journal table.

*The Journal coffee table frame is a hand made item.
The frame itself is fabricated from solid brass or powder coated steel. In each case the marble or timber top has been scribed to fit the hand made base as no two tables are exactly alike.
The brass frame will naturally tarnish or go dull over time when exposed to oxygen. Your frame will be supplied with a thin coat of Bri-wax which will slow down this process.
The Bri-wax may be removed with Bri-wax remover for cleaning and polishing purposes. A new coat of Bri-wax should then be applied. This is a quick and simple process.*
